Powered by Horizontal® Therapy

Enhance the quality of care for your patients

Immediate results on most of your patients with pain syndromes.

Hako-Med's non-invasive pleasant treatment delivers immediate positive results even on difficult to treat patients. HT-Therapy™ is beneficial for patients suffering from arthritis pain, back pain, pain from herniated disks as well as circulatory disorders.

Cumulative benefits without negative side effects.

Most patients experience a significant improvement of their pain condition(s) over time, opening up the possibility of discontinuing dangerous and costly drugs. Hako-Med's patented HT-Therapy™ focuses exclusively on treatment results which will not only benefit your patients but may increase you practice revenue in multiple ways.

Increase your practice revenue

Added service*

Adding HT-Therapy™ to your practice provides you with an additional billable service. The unprecedented positive results of HT-Therapy™ may translate in better retention of your patients who will then also utilize more of your existing services. Positive treatment results may also lead to additional patients and fewer outside referrals of your existing patients.

Excellent reimbursement*

Existing reimbursement can make the Hako-Med system an instant profit center in your practice while significantly increasing the level of care for your patients. Better treatment results may also translate into money savings for insurance carriers. A true win-win situation.

No out of pocket cost*

Leasing and acquisition options are available on approved credit that tailor payments to your specific needs. It may even be possible to defer the initial payment until after you receive your first reimbursements.

Horizontal® Therapy (HT-Therapy™)

Horizontal® Therapy (HT-Therapy™) is at the heart of Hako-Med's successful treatments. HT-Therapy™ is a perfect combination of four continuously evolving cornerstones.

Patented Technology: Exclusive to Hako-Med, HT-Technology is the process of creating specific action potentials through the use of the FM (frequency modulation) technology which allows for simultaneous creation of bioelectric and biochemical mechanism of action.

Research: Hako-Med has conducted extensive research around the world with HT-Technology and has brought many clinical studies to publication. The end result is an in depth understanding and validation of the optimum parameters of HT-Technology and the specific effects which they produce.

Protocols: Hako-Med has developed proprietary treatment protocols and programs for the optimum treatment with Hako-Med's patented HT-Technology based on extensive research and feedback form Hako-Med physicians.

Devices: Hako-Med's devices with HT-Technology are easy to use, turnkey treatment systems with a proven track record of reliability containing all the protocols and necessary technology in order to provide optimized treatment results.

Pain

HT-Therapy™ offers seven unique pain-relieving mechanisms of action, which include short term as well as longer lasting effects.

Arthritis

HT-Therapy™ strives to achieve immediate effects in patients suffering from pain from arthritis, which include reduction in pain, decrease in edema, and increase in range of motion.

Healing

HT-Therapy™ delivers mechanisms of action, which may influence the healing processes through increase circulation.

Prevention

HT-Therapy™, as a potential positive side effect, may prevent injury and diseases due to HT-Therapy's™ effects on increased circulation, neuromuscular reeducation and increased mobility.

About Hako-Med

For decades Hako-Med has been a reliable partner to physicians worldwide. Originating in Germany, Hako-Med's scientists have continuously been on the forefront of medical innovation. Distinguished accomplishments include the inventions of such milestones in the science of bioelectric medicine as dynamic interferential therapy, EDT, and HT-Therapy™. Hako-Med has become synonymous with positive treatment results in bioelectric medicine as well as world-class service.

Where and when available, Hako-Med offers a free demonstration installation at your facility. Hako-Med representatives will demonstrate the immediate positive effects on a few of your difficult to treat patients as well as the ease of use and seamless integration of Hako-Med devices into your practice.
