

# Revo<sup>®</sup>

5-Minute PAD Testing  
Interactive Touchscreen  
Dual-Channel Capability

The **Revo<sup>®</sup> 1100** is an affordable, network-compatible system to detect Peripheral Artery Disease (PAD). In less than five minutes, doctors can perform an accurate PAD examination on their patients, view the results, and print them for further review.

**Medical Device Depot**

## Features

- Complete single-level peripheral artery disease (PAD) examination in less than five minutes
- Dual-channel technology enables practitioner to perform simultaneous, bilateral waveforms and pressures (both arms, legs, or toes concurrently)
- Provides hard-copy waveform tracings taken at the ankle level with continuous wave Doppler or calibrated pulse volume recordings (C-PVR<sup>®</sup>)
- Full-color, high-resolution touchscreen user interface

## Benefits

- A fast, efficient diagnosis leading to quicker results and, therefore, quicker treatment
- Increased accuracy and greatly reduced exam times providing more immediate findings while improving patient comfort
- Full, documented results allowing the examination to be reimbursable under CPT code 93922
- A simple, interactive display promoting ease of use for staff

# Sample ROI

<b>CPT Code</b>	<b>Description</b>	<b>Weekly Quantity</b>	<b>Reimbursement</b>	<b>Total</b>
93922	Single-Level Arterial	6	\$110	\$660
			Weekly Gross	\$660
			Average Monthly Gross	\$2,640
			Average Yearly Gross	\$31,680

\* Weekly test numbers are based on the average of one referring physician. Contact your local Criticare/Unetixs representative for local Medicare reimbursement.
