IMPROVING QUALITY OF CARE & REIMBURSEMENT

DrUG FREE PAIN TREATMENT SYSTEM

Possess the most advanced tool in the field of electromedicine; the PRO ElecDT® 2000. Quite simply, the ultimate in electromedical systems.

Patients benefit from Hako-Med's immediate positive treatment effects. In many cases allowing patients to reduce or discontinue pain medications with dangerous side effects.

Physicians benefit by growing their practice and their bottom line without using any additional capital or resources all while increasing the level of care for their patients.

Clinical Usage:
- To stimulate peripheral nerves for the purpose of providing pain relief and to stimulate motor nerves for the purpose of providing muscle re-education
- Chronic pain conditions
- Adjunctive treatment of post-traumatic pain syndromes
- Management and symptomatic relief of chronic (long-term) pain
- Adjunctive treatment in the management of post-surgical pain problems;
- Relaxation of muscles spasms
- Prevention or retardation of tissue atrophy
- Muscle re-education
- Increasing local blood circulation
- Immediate post surgical stimulation of the calf muscles to prevent phlebothrombosis
- Maintaining and increasing range of motion

Clinical Benefits:
- Non-invasive, non-toxic, safe and effective.
- Minimal side effects, easily avoided.
- High patient compliance and satisfaction.
- Easily administered by existing staff

Revenue Generation:
- Bioelectric treatment utilizes several existing CPT codes and produces superior reimbursement revenue generation for the practice. Actual reimbursement varies according to billing specialty and regional reimbursement averages.

Dr. Nevada Lee, M.D. is featured in the cover article of Medical Economics discussing how her practice utilizes a Hako-Med PRO ElecDT 2000 system to "really make (my) patients feel better."

Using existing Medicare reimbursements the Horizontal Therapy system "helped us survive the first two years" of my practice.
