

Basic Emergency Medical Kits

The Essential Emergency Medical Kit for the General Dental Practice

The **SM-Series** Emergency Medical Kit (EMK) from HealthFirst is designed for the general dental practice (*not practicing sedation dentistry*) who wants to be compliant and prepared for medical emergencies.

The contents of the SM-Series EMKs **meet today's standard-of-care**, are **compliant** with many state regulations and are **consistent** with the recommendations from the ADA, JADA* and the HealthFirst Independent Medical Advisory Board.

The medications and devices are **quick, safe** and **easy** to administer:

- Epinephrine Auto-Injectors & Back-up Ampules
- Diphenhydramine
- Albuterol Inhaler
- Nitrolingual Pump-Spray or Nitroglycerin Tablets
- Aspirin
- Ammonia Inhalants
- Glucose
- First Aid Equipment
- Dedicated Oxygen (optional)

SM-Series Kits include HealthFirst's Keep-Me-Current-Automatic medication expiration tracking and refill service that **reduces costs, maximizes medication shelf life, ensures emergency readiness**, and gives you the time to focus on your practice and your patients.

Optional Oxygen Cylinder & Cart Available for all Models

Save money while gaining peace-of-mind that you're compliant

The HealthFirst **Keep-Me-Current-Automatic medication expiration tracking and refill system** automatically

monitors expiration dates and ships replacement medications before they expire. This maximizes medication shelf life and provides you with the confidence that your practice is prepared for a basic emergency. Because the shipments are automatic, you don't have to worry about manually tracking multiple expirations or ordering your replacement medications. Keep-Me-Current-Automatic keeps you compliant and saves you money because Auto-Refill prices are discounted from the retail price.
